2. SYSTEM GENERATED JOB TRANSMITTAL SHEET (JTS): REPORTING

End User: Tender / Sales Engineers

Once the tender module details are updated for a given project, the JTS is generated through CMS automatically. This doesn't duplicate the present manual JTS preparation instead the system generated can be submitted for approval. JTS output generated by the CMS is accepted by commercial for official purpose. It given an advantage over manual JTS preparation; at any point of time the JTS can be generated for particular project by a click.
